

REVOLUTIONARY MEXICO

The following 158 lots are coins of the Mexican Revolution from 1910 to 1920. Many of the pieces are from the collection of Mr. Birger Sundstrom, a Swedish mining engineer who lived in Guerrero from the 1920's to the 1950's. He was able to acquire a number of great rarities within a few years of their date of issue.

On December 4, 1959 we presented the first part of Mr. Sundstrom's collection including a Oaxaca 60 Pesos Gold and a Oaxaca gold 5 Pesos struck in copper. The latter piece has not reappeared since. At that time the gold 60 Pesos sold for \$1250.00 and the copper 5 Pesos for \$15.00. Today's high prices will probably seem just as ridiculously low two decades from now.

According to Sanchez Garza, General Jesus Salgado, Zapata's most able lieutenant in Guerrero, ordered the striking of silver 2 Pesos pieces at the sugar plantation of Atlixat, about 1/4 mile from the railway station of Apilpulco, in mid-1914. These were the first Guerrero dollar sized coins authorized and struck. The silver for these coins was brought from Campo Morado, a silver mining camp nearby. This was before a mint was opened in Campo Morado itself. Apparently, the issuing authorities soon decided that it would be easier and safer to strike the silver coinage at Campo Morado itself rather than transport the bullion to Atlixat.

Again according to Sanchez Garza, the dies were cut by Severo Hernandez, and the coins were struck by Ingeniero José Barrios.

We believe this coin to be the Grand Daddy of all Zapatista Dos Pesos pieces - the original design which for some reason was altered slightly in later issues from other provisional mints.

We can trace the whereabouts of this remarkable coin for over fifty years, and never have we heard even a rumor of the existence of a second specimen.

At this convention last year, a Suriana Dos Pesos, of which approximately half a dozen examples are known, realized (25,000.00). Accordingly we believe that this unique Atlixat Dos Pesos piece should and will command a healthy five figure price.

preceding.

Late in 1914 the various revolutionary jefes held a convention in Aguascalientes. The Villista and Zapatista forces disavowed the leadership of Venustiano Carranza and took control of the convention. The government which evolved from this convention was called, naturally, El Gobierno Convencionista and its army was called El Ejercito Convencionista.

In the town of Amecameca de Juarez in the State of Mexico a Convencionista General named Trinidad Sanchez Tenorio issued coins in the name of the Convention's Army. Only two denominations are known struck in the army's name, and each is unique - the 5 Centavo piece in the Banco de Mexico collection and the 25 Centavo piece offered here which comes from the Birger Sundstrom collection.

With the 5 Centavo piece permanently locked up, it is likely that this 25 Centavo piece is the only coin of this issuing authority which will ever come up for sale. It should realize a strong four figure price.

Re: Lot 1615: On this piece, the die for the reverse was engraved to read normally. Hence, a coin struck from it has all details backwards but in relief, as opposed to a brockage which would be backwards but incuse. Obviously the error would be discovered as soon as coins were struck from the die, and the die discarded.

In the following group of Oaxaca 2 Peso pieces, two of which are not in the Guthrie/Bothamley catalog, we have reversed the normal order of listing. We have done this because we feel that with a provisional, inflationary coinage, the larger, heavier pieces were almost certainly issued before the smaller light pieces.
