**THIS IS THE LARGEST COLLECTION OF MEXICAN PAPER MONEY
OFFERED FOR SALE SINCE 1974.**

Nicanor Vega assiduously collected the paper money of Mexico for over 16 years. In this catalogue you will be able to appreciate the extensive collection he was able to assemble. There are many rarities and high-grade notes in every section. No doubt, there is something for every collector of paper money. Each and every phase of the paper money of Mexico is amply represented as is the history of Mexico in each of its phases since the first paper money issued by Agustín de Iturbide in 1823. This is one of those rare opportunities for collectors at any stage of advancement to add any number of pieces to their collections.

All notes in this catalogue belong to the Nicanor Vega collection, and every note pertaining to his collection may be found in this catalogue. There are no other consignments.

The cataloguer has not used the terms, scarce, very scarce, rare, and very rare in a vast majority of the cases where they apply because he feels that the estimates set forth are sufficient to indicate the scarcity or rarity of the piece in question. An exception to this rule is true; however, of many of the private, municipal and military issues. In these cases, though values are probably much lower than scarcity would indicate, the estimates presented in this catalogue are much more indicative of those values set by the supply and demand of these items on the numismatic market both in Mexico and the United States. It is precisely this type of note which generally is in greater demand in Mexico than in the U.S.

As I usually have done on my price lists, in this catalogue I have used three catalog numbers: Gaytán, Pick and Vogt (Krause Publications) in this order. I do not offer these catalogues for sale because I would have to import them from the U. S. and export them again, which would increase the retail price far above what it normally is in the U. S. I am listing these catalogues for you as follows so that you may obtain any one you wish in the U. S. Try your local dealer or any one who deals in Mexican numismatics, or write directly to Krause Publications for either of the last two:

1. Paper Currency of México by Carlos Gaytán
2. Standard Catalog of World Paper Money by Albert Pick (Krause Publications)
3. Standard Catalog of Mexican Coins, Paper Money & Medals by Dr. George Vogt (Krause Publications, Iola, Wisconsin, 54945).

I feel it is an honor to have been chosen by Nicanor Vega to catalogue and auction his collection. At the same time, I also believe it is an outstanding opportunity for collectors to obtain new items, and, last but not least, it is my sincere wish that this catalog serve as an important reference in the future for all collectors of the paper money of Mexico.

TERMS OF SALE

1. This is a mail auction sale and all lots will be sold to the high bidder.
2. We reserve the right to reject any or all bids. Unlimited bids are not accepted. Telephone bids will not be accepted unless written confirmation is received before the auction deadline.
3. All items offered are guaranteed to be genuine unless the lot description specifies otherwise.
4. Please check your bid list carefully. We cannot be responsible for errors made on your bidding list; however, if there is an error in cataloguing, we will see to it you are completely satisfied.
5. You may bid freely with the knowledge that all bids will be reduced to 10% over the second highest bid. For example, when the two highest bids on a given lot are \$50 and \$90, the \$90 bid will receive the lot for \$55.
6. Since the mail service from the U.S. to Mexico is frequently slow (6 to 14 days), we recommend that all bids be sent at least 15 days before the auction deadline. All bids should be sent by airmail. Bids arriving after the deadline will not be accepted. All lots will be shipped by registered air mail.
7. All bids must be made in U. S. dollars, and payment in U. S. dollars should be made on receipt of invoice. Personal checks, money orders or cashier's checks are accepted. Established customers will be shipped lots with invoice. New customers, and those with whom there has been a problem in the past, will be invoiced first and lots shipped after payment has been received.
8. If you have never ordered from us before, please furnish adequate credit references or accompany your order with a deposit of 25% of the total of your bids.
9. Postage and shipping charges incurred will be added to invoices.

10. In case of tie bids, the first received will be declared the winner.
11. Estimates appearing in this catalog are only a guide to help indicate a reasonable value and are not necessarily prices at which lots will sell. Your bidding may be generous in that clause No. 5 above protects you.
12. Prices realized will be available about 2 weeks after the sale closes at a price of \$2 each. Please include payment with your request.
13. Lots will be available for inspection by appointment during the weeks preceding the auction deadline.
14. Title to all lots remains with the cataloguer until full payment is received.

PAPER MONEY OF MEXICO

NICANOR VEGA COLLECTION

“CARTONES”

“Cartones”, cardboard or pasteboard issues are usually small issues of fractional currency, though sometimes they also exist in 1, 5 and 10 Peso denominations, which were printed upon cardboard or pasteboard and normally exist in sizes of approximately 54 X29 millimeters. The size fluctuates greatly from one issue to another. There are some cases of 50X 28 millimeters and others as great as 88 X 57 millimeters.

These are interesting private, municipal, state or military issues which have become more and more popular among collectors. The Nicanor Vega collection contains a very extensive group of these little “cartones” which, as presented in this auction, are an unusual opportunity for collectors to reach an advanced collecting level in this particular specialty of Mexican paper money.

Due to the fact that they were usually printed on pasteboard, many are found in high grades. Undoubtedly, they were able to weather the passage of time in a more favorable condition than bank notes or most other types of paper money.

The collecting of “cartones” comprises a very important part of the paper money collection of México. It is unlikely that such an extensive group of these attractive little pieces of Mexican fractional currency will be placed on auction again for many years to come. I wish you the best of luck in obtaining those pieces you wish to acquire for your collection.

The first section of this catalog, that is, lots No.1 through No.292 is comprised exclusively of “cartones”.

265 different "cartones". Seven sets of series and subseries varieties.
It took years of patience to assemble this incredible group of
"cartones". The effort involved should be passed on to another collector by keeping it intact. Though, these notes are still relatively common, in my opinion, it would be highly unlikely to have access to enough of them now-a-days to assemble another collection of this nature. Condition varies between G and UNC; average is F; all are quite acceptable (265 pieces) (\$150.)

Of all types of paper money, bank notes are, undoubtedly, the most popular. The bank notes of Mexico have become ever-increasingly popular the last few years, and there are many advanced collectors of this specialty.

Nicanor Vega devoted no less time to the tracking down of high-grade, scarce and rare bank notes of Mexico than to the others, as can be well appreciated by the extensiveness of this type of material as it appears in this section, which presents bank notes, private, municipal, state and military issues of Mexico by state as they appear in the Gaytán catalog; though, all notes are listed with the three catalog numbers, as usual.

There are also numerous scarce and rare issues of all the types mentioned. In fact, it is hard to believe that so many scarce and rare notes are found in a single collection; however, this is understandable, if we take into consideration the fact that Mr. Vega has always been a very serious and devoted collector who practiced his numismatic assiduity constantly for over 16 years.

In fact, I have known of no other collection as extensive as Mr. Vega's having been placed on auction or for sale during the 10 years I have been in numismatics and I am aware of the 1275 lot auction held by Richard Long on November 30, 1974. This particular collection was probably the largest ever assembled; however, only a very few bank notes appeared in the auction. In the present auction, every note pertaining to the Vega collection is included.

It is the cataloguer's wish that each and every one of you find interesting notes for your collection.

FEDERAL DISTRICT

- 442 D.F. 3, P-148, V-121, 10P, El Bando de Londres, México y Sud
América, hand-dated; 2nd of September of 1878, Bradbury, Wil-
kinson & Co. Engravers & C. London, one large bold
hndsig. at left and one printed signature at right, both for 'Gerente'
or manager. Serial number 06076. Portrait of Moctezuma
appears in left vignette and two burros in right vignette. Tax seals
at right and left on reverse. This is the bank note which appears
on the covers of this catalog and is the key note in this auction. No
other note of this type is known to the cataloguer and it is consi-
dered unique.

This is the only 10 Peso denomination known to exist issued
by the first bank to be established in México, though approxima-
tely four or five signed notes are known in other denominations.
The owner has placed a reserve on this piece. Spirited bidding is
expected from all over the world. Condition is G. There is no tape.
Edges are frayed as is normal for this grade.

The estimate is considered very conservative for a unique,
signed note issued by the first bank of México. \$2,800.

DURANGO

Both the bank notes and state and military issues of Durango which follow are, perhaps, one of the most complete collections of the paper money of the State of Durango in existence. There are also many high grade notes in all areas. This is one of those rare opportunities for collectors to obtain high-grade scarce material for their collections.

The following nine lots are an incredible group of very rare notes. They were all issued by the Constitutional Government in Durango in 1914 and 1915. I have never seen another collection with half the number of notes of this series. Gaytán lists eight different notes issued by the Constitutional Government. All eight are present in this group plus a new unlisted variety. All are with black ink on black paper.

GUANAJUATO

This is one of those rare occasions when the complete series of a bank is offered at auction. It is a well known fact that the high denominations of most Mexican bank notes are rare; however, here is an opportunity to acquire the very scarce 100 P, the extremely rare 500P, and the unique 1000P.

In 1943 the government authorized the banks of Mexico to issue checks with the denomination of 50C printed on them in order to help solve the problem of the shortage of fractional currency which existed at that time. A number of banks issued these checks, which in my opinion, should be considered bank notes because they bear the printed date and denomination. Evidently, very few of these notes were printed, or most of them were withdrawn, because all of them are very scarce today and most, in fact, are quite rare. A number of these notes appear throughout this collection and, with the exception of Nuevo León, there is only one from each bank; however, in the case of Nuevo León there are six different 50C notes of this type. This is, indeed, an exceptional group and it is highly unlikely we will ever have another opportunity of seeing so many of them together.

From the State of Puebla, the series of bank notes from the Banco Oriental de México is complete from the one peso through the 1000 peso. Both the 500 and 1000 peso notes are in nice high grades for this type of note and are superb examples for any collection. Besides the complete representation of all the denominations of this bank, there are two very rare proofs by the American Book & Printing Co. and a small but select group of revolutionary and military issues.

T A B A S C O

It is a known fact that Tabasco is one of the more difficult states for completing a series of all denominations of its bank; actually, it may also be said that most all other notes of this state are very scarce to rare; in this case, we again present a complete series of bank notes from the five peso to the one hundred pesos. The 20 peso note of the Bank of Tabasco is probably the rarest of the whole series; however, catalogs indicate the 50 and 100 peso notes to be scarcer; there is no doubt that all three are very scarce to rare and are quite desirable for any collection. Most of the other state notes of Tabasco presented in this catalogue are also very scarce.

- 1046 TAB 1, P-318, V-308a, 5P, ABNC, Banco de Tabasco, series
A, 15/10/01, G (20.)
- 1047 TAB 2, P-319, V-309a, 10P, ABNC, Banco de Tabasco,

- 1048 TAB 2, P-319, V-309a, 10P, ABNC, Banco de Tabasco,
19/09/03/, F (45.)

- 1049 TAB 3, P-320, C-310, 20P, ABNC, Banco de Tabasco, series A, 01/01/01, this note is actually seen much less than the 50P or 100P of this series; this one is a very acceptable handsigned G/VG, very rare (500.)
- *1050 TAB 4, P-321, V-311, 50P, ABNC, Banco de Tabasco, series A, 01/01/01, another very rare piece; handsigned, serial No.365, G (500.)
- 1051 TAB 5, P-322, V-312, 100P, ABNC, Banco de Tabasco, series A, 01/01/01, handsigned, serial No. 1860, very rare, a nice F (750.)

TAMAULIPAS

In the case of the Bank of Tamaulipas we cannot say that we are presenting another complete series of bank notes, but we can almost say it. Actually, the 100 peso note which is the only one missing is not, by far, the most difficult to obtain. The 500 and 1000 are much rarer, even when unsigned and unissued. Study the revolutionary notes of this state also, as there are also some very rare and exceptional notes.

BRANCH OVERPRINTS ON BANK NOTES

The early banks of Mexico would stamp an overprint on their notes when they were assigned to branch offices located in cities and towns outside of Mexico City. In most cases, we find two overprints repeating the name of the city at each side or, less frequently, the names were overstamped diagonally or, less frequently yet, the overprint appears only once. The two Mexico City banks of "Londres y México" and "Nacional de México" had the largest number of branch offices throughout the country and these notes are those most commonly found now-a-days; however, branch overprints on notes issued by several other banks also exist, though to a much lesser degree. Since, all of these notes circulated much more than most notes normally did, they are rarely found in high grades and when they do appear, they are highly sought by collectors. Normal grades for these notes are Fair to Good. Branch overprints on high denominations are also quite scarce or rare.

Nicanor Vega collected this type of notes over a long period of time and we have the results before us. The cataloguer presents these notes by bank and uses the Vogt catalogue by Krause Publications as it is the only one that seriously lists them.

REVOLUTIONARY OVERPRINTS

During the Mexican Revolution it was common practice for opposing forces, government and state departments and offices to affix official seals and stamps to currency with the purpose of giving it a new value, legalising its current circulation, expressing its acceptance by an official body other than the one of issue, ordering compulsory circulation in areas for which it was not originally intended, cancelling and withdrawing it from circulation, etc. etc.

The difficult time and lack of hard cash brought about many extensive issues of paper money as well as numerous overprints of the same.

The collecting of the revolutionary paper money of Mexico bearing these overprints has, at times, been a rather obscure area due to a lack of knowledge regarding their purpose, etc. Nicanor Vega, very painstakingly, assembled an extremely extensive collection of this type of notes. It is highly unlikely that another with so many varieties exists today. This is another example of this high-quality "old-time" collection.

In most cases, there are three determining factors for value. One is the condition of the note itself; the second is the clarity of the overprint, and the third is the number or overprints appearing on a single piece. The more there are, the greater the value.

The following collection contains a number of very scarce pieces and several extreme rarities. The cataloguer has preferred to place low estimates on them in general, though there can be no doubt that bank notes of the same scarcity or rarity bring bids of from 10 to 100 times the estimates for these overprints. This should be a good long term investment. In fact, this is the first time I have ever seen anything like this for sale which, for me, is a definite indication of the great rarity involved.

SIMILAR - CONNECTED - RELATED

There are certain types of issues that are closely, or not so closely related to the paper money of Mexico, and which are popular among collectors.

Nicanor Vega during his years of collecting assembled an interesting group of related issues which include lottery tickets, political bonds, electoral checks, cooperation or donation bonds, postal vouchers, postal money orders, public debt coupons, fantasy issues, private overprints on official issues, etc. etc. A few of these are catalogued by Carlos Gaytán and, when catalogued, the corresponding numbers are given. All lottery tickets are printed on very thin paper.

- 1414 SyM 3, Raffles # 82 and # 93 of the lottery sponsored by the Sanctuary of our Lady of Guadalupe. May 17, 1804, and May 31, 1805. Two pieces. Each has a value or cost of two Reales. VG, EF (24.)
- 1415 SyM 3, Raffles # 490 and # 658 as described above (lot 1414). Dec. 7, 1821 and March 18, 1830. Two pieces. VF, VF (22.)

Auction of the Nicanor Vega collection held by Duane D. Douglas, Apartado 24-555, México 7, D. F., Mexico. Closing date: July 25, 1979.

If there is a very small difference between your bid and the winning bid please remember that, in most cases, this is probably due to the 10 % raise over the second bid to which all winning bids have a right, thus, it is convenient to keep in mind that most of the high bids in this auction were reduced.
